

# *STATE OF INDIANA*

*AUDITOR OF STATE  
TIM BERRY*

Prepared 12-1-2010

# **SPRING ABSTRACT MANUAL**

## **FILING ELECTRONICALLY**

The Auditor of State is pleased that the County Auditors are filing the Spring Abstract electronically.

Several questions always arise when completing the abstract, because this is a process done once a year. We have developed the following manual to help guide you through the process.

The Introduction and Part I, II, III and IV of this manual are primarily for the use of the abstract worksheet. Part V of this manual provides information about the abstract data.

If you have any questions, please contact:

**Brenda Alyea, Settlement Analyst**

## TABLE OF CONTENTS

---

### Introduction

Requirements .....	6
Disclaimer .....	7
General Information .....	8-9
Abstract Process Overview .....	10-11
Getting Started .....	12

### Part I - Worksheet Data Entry

Setting Macro Security.....	14-15
Data Entry Overview.....	16-17
Entering Section 1A & 1B Values and Deductions.....	18-20
Entering Section 5 Grand Total Current Taxes.....	21-22
Entering Section 5 Statement Processing Charges.....	23-24
Entering Section 5 Late Assessment Penalties.....	24-25
Entering Section 5 Delinquent Tax & Penalties .....	26-27
Entering Section 5 Homestead Property Circuit Breaker Amounts.....	27-28
Entering Section 5 Non Homestead Residential Circuit Breaker Amounts..	29-30
Entering Section 5 Other Real & Personal Property Circuit Breaker Amt..	30-31
Entering Section 5 Over 65 Circuit Breaker Amounts.....	32-33
Entering Section 5 LOIT PTRC Rates.....	33-34
Entering Section 5 LOIT PTRC Amounts .....	35-36
Entering Section 5 COIT HSC Amounts .....	36-38
Entering Section 5 CEDIT HSC Rates.....	38-39
Entering Section 5 CEDIT HSC Amounts .....	40-41
Entering Section 5 CEDIT Res PTRC Rates .....	41-42
Entering Section 5 CEDIT Res PTRC Amounts .....	43-44
Entering Section 5 LOIT HSC Rates .....	45-46
Entering Section 5 LOIT HSC Amounts.....	46-48
Entering Section 5 LOIT Res PTRC Rates .....	48-49
Entering Section 5 LOIT Res PTRC Amounts.....	49-50

## **Part II – TIF (Tax Increment Financing) Data Entry**

TIF District Names.....	52-54
TIF Tax Rates .....	54-55
TIR (TIF Increment Replacement) Rates.....	56-57
TIF LOIT PTRC Rates .....	57-59
TIF COIT HSC Rates .....	59-60
TIF CEDIT HSC Rates .....	60-61
TIF CEDIT Res PTRC Rates .....	62-63
TIF LOIT HSC Rates.....	63-64
TIF LOIT Res PTRC Rates.....	65-66
TIF Section 1 Data Entry .....	66-68
TIF Section 5 Grand Total Current Taxes .....	69-70
TIF Section 5 Statement Processing Charge .....	70-71
TIR Section 5 Late Assessment Penalties.....	71-73
TIF Section 5 Delinquent Tax & Penalties.....	73-74
TIF Section 5 Homestead Property Circuit Breaker Amounts .....	75-76
TIF Section 5 Non Homestead Residential Circuit Breaker Amounts.....	76-77
TIF Section 5 Other Real & Personal Property Circuit Breaker Amt.....	78-79
TIF Section 5 Over 65 Circuit Breaker Amounts.....	79-80
TIF Section 5 LOIT PTRC Amounts.....	81-82
TIF Section 5 COIT HSC Amounts.....	82-83
TIF Section 5 CEDIT HSC Amounts .....	84-85
TIF Section 5 CEDIT Res PTRC Amounts .....	85-86
TIF Section 5 LOIT HSC Amounts .....	86-87
TIF Section 5 LOIT Res PTRC Amounts .....	88-89

## **Part III – Reviewing Abstract Worksheet**

Reviewing Abstract General Information .....	91
Reviewing Grand Total Current Taxes Differences .....	92-94
Reviewing LOIT PTRC Differences .....	94-95
Reviewing COIT HSC Differences .....	96-97
Reviewing CEDIT HSC Differences .....	98-99
Reviewing CEDIT Res PTRC Differences .....	99-101
Reviewing LOIT HSC Differences .....	102-103
Reviewing LOIT Res PTRC Differences .....	103-105
Reviewing County General Fund Differences .....	105-107

**Part IV – Saving Abstract Worksheet**

Saving Worksheet .....	109
------------------------	-----

**Part V – Abstract Detailed Information and General Instructions**

General Information .....	111-112
Section 1A .....	113-115
Section 1B.....	116-119
Section 5 .....	120-129
Sections 2 through 4 .....	130-132
Filing Abstract.....	133

## REQUIREMENTS

---

There are a few hardware/software requirements needed in order to complete the abstract worksheet:

1. IBM compatible PC.
2. Excel spreadsheet software.

Questions regarding your ability to meet the requirements should be directed to your Data Processing Manager or Hardware Vendor.

It is **STRONGLY RECOMMENDED** that this manual is read prior to using the abstract worksheet.

Some of this material will refer to your system and Excel worksheet software.

As you perform part of the tasks, you may need to refer to your system and Excel software instructions. Since the Auditor of State's Office is not familiar with all the different systems that county auditors have, it is impossible to write instructions specific to each county's system.

# ***DISCLAIMER***

***The abstract worksheet is the sole property of the Auditor of State's Office. Unauthorized use is strictly prohibited. The mathematical formulas in the worksheet are subject to manipulation by the user, whether authorized or unauthorized, all warranties and liabilities for false or incorrect mathematical calculations are disclaimed by the Auditor of State's Office***

## GENERAL INFORMATION

---

Do not become overwhelmed by the length and detail of this manual. Using the worksheet is much easier than what it may first appear.

This manual will take you step by step through the process of preparing the abstract.

To the right of Section Five are Review Columns. These columns will help you analyze the grand total current taxes, LOIT property tax replacement credit, COIT, CEDIT and LOIT homestead credit, CEDIT and LOIT Residential property tax replacement credit, and rounding adjustments made to the county general fund amount. The review columns will help you determine if the abstract appears to be correct prior to submitting it to the Auditor of State's Office.

The review columns and the steps to enter data will be discussed at length later in this manual.

The worksheet will be delivered to you loaded with your county's taxing district names, DLGF taxing district codes, fund names and tax rates. You will enter to the worksheet assessed value data, current taxes charged including circuit breaker amounts, property tax replacement and homestead credit amounts, delinquent taxes and penalties and, if any, TIF data. Formulas in the worksheet will calculate all totals and the allocations of taxes between the funds in Sections 2 through 4.

## **IMPORTANT**

**There are predefined formulas in the worksheet DO NOT change any formulas or ADD, or DELETE ROWS and/or COLUMNS. Changes made to any of the formulas will cause calculation errors.**

**The worksheet also contains the taxing district names, DLGF taxing district codes, fund titles, tax rates, and, if applicable, COIT homestead credit rates specific to your county. These items ARE NOT to be changed in anyway.**

**Data is only to be entered into unprotected cells. DO NOT remove protection from any of the protected cells. If any of the preloaded data in the worksheet is incorrect please contact Brenda Alyea or Janie Cope immediately.**

## **ABSTRACT PROCESS OVERVIEW**

---

- State Auditor sends to Department of Local Government Finance (DLGF) an Excel abstract worksheet.
- Once DLGF certifies tax rates for a county, then DLGF loads to the abstract worksheet the county's taxing district names, DLGF taxing district codes and tax rates including the COIT homestead credit rates, if applicable.
- DLGF returns abstract worksheet to State Auditor.
- If applicable, State Auditor sends to County Auditor local property tax credit(s) rate calculation worksheet(s).
- County Auditor returns to State Auditor completed local property tax credit(s) rate calculation worksheet(s) as applicable.
- State Auditor reviews rate calculation worksheet(s) to determine if calculations appear to be reasonable.
- State Auditor's Office sends abstract worksheet to County Auditor's Office by e-mail.
- County Auditor enters to abstract worksheet Section 1 and Section 5 data for all taxing districts and, if applicable, all TIF District information.
- County Auditor verifies data entered to abstract worksheet is correct and reviews the Review Area difference columns.
- Once the County Auditor determines that the differences in the Review Area difference columns are rounding differences, then the County Auditor returns abstract worksheet to the State Auditor by e-mail.
- State Auditor's Office verifies that the information entered into the abstract worksheet appears to be complete and correct.

- When the State Auditor's Office has verified that the information on the abstract worksheet appears to be complete and correct, then the County Auditor is notified that the abstract is approved.
- The DLGF will review the abstract data to determine if it is compliant. If the data is found to be compliant, the State Auditor's Office will distribute two coversheets to the county. Both coversheets should be signed by the county auditor. One signed coversheet is returned to the State Auditor's office.
- Once the signed coversheet is received by the State Auditor's Office a printed copy of the abstract will be sent to the county auditor.
- **Your County will not receive an official approval letter until the State Auditor has received one completed and signed coversheet and one tax rate sheet.**

## GETTING STARTED

---

The following instructions will assist you in accessing the Excel Directory, loading the worksheet and saving a copy of the worksheet for a backup.

1. Accessing the Excel Directory on your PC:
  - A. If there is an Icon set up to access Excel, then double click on the Icon to start Excel.
  - B. If there is no Icon, click on the Start Button in the lower left-hand corner of the screen and go to the Program Menus. Find the Excel icon and double click.
  - C. When Excel is opened, a blank worksheet will display.

**If you are using Excel 2000, then go to page 14 of this manual before proceeding. Otherwise proceed to 2.**

2. Saving the Abstract from Email to your PC.
  - A. Open E-mail
  - B. Right click on the attached file and choose **"Save As"**
  - C. **( DO NOT OPEN ATTACHMENT).**
    - a. If you opt to save the file to your PC hard drive follow the instructions to change the directory to "C" that immediately follows.
    - b. If you opt to save the file to the network hard drive you will need to change the directory to the network directory.
  - C. Change the directory to "C". It is advisable to create a subdirectory of "C" by creating a new folder. If further assistance is needed creating the subdirectory please contact your in-house systems personnel.

# ***PART I***

## ***WORKSHEET DATA ENTRY***

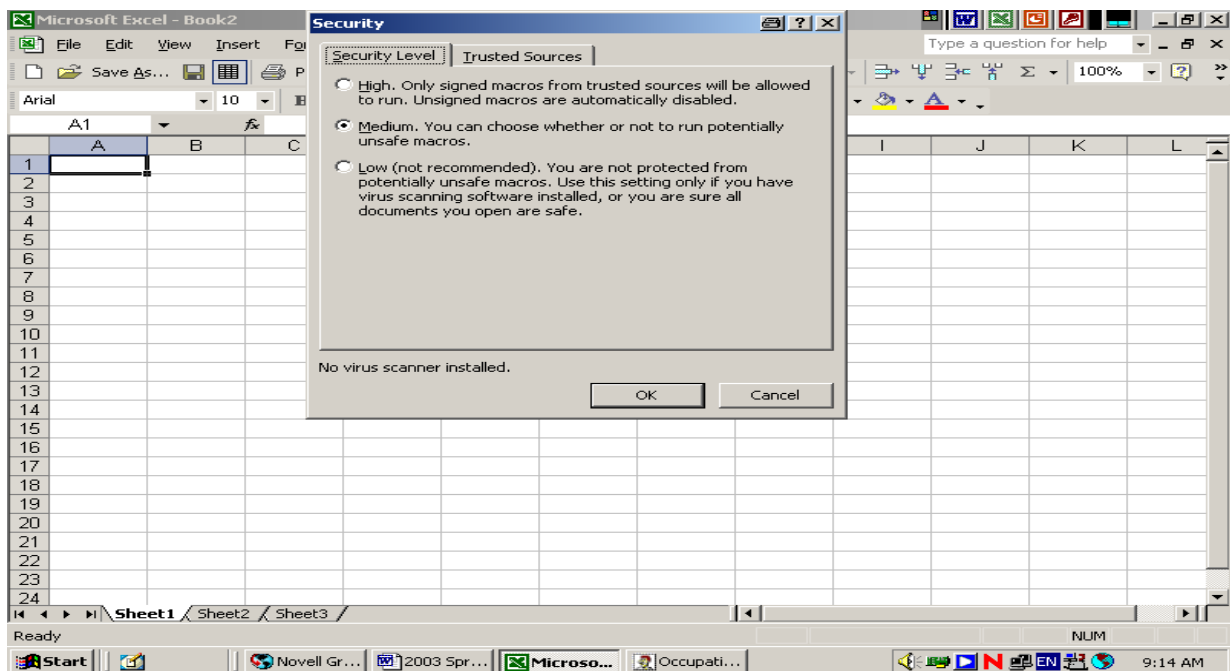

## SETTING MACRO SECURITY

If you are using Excel 2000, then the macro security must be checked prior to opening the abstract worksheet. The macro security must be set at the medium level. If it is not set at the medium level, then the worksheet macros will not work properly.

To set the Macro Security do the following:

1. Make sure you have a blank worksheet open.
2. Select “TOOL” from the menu bar.
3. Select “MACRO” from the drop down menu.
4. Select “SECURITY” from the second drop down menu.

When the “Security Option” has been selected the following screen will appear:

Make sure the “Security Level Tab” is selected. There will be three options to choose from. Select the middle option **“MEDIUM” You can choose whether or not to run potentially unsafe macros.**

After the “MEDIUM” option has been selected click the “OK” button. You will return to a blank worksheet.

**Now the abstract spreadsheet can be opened to save the worksheet, or start data entry.**

If you are using Excel 2007, then the Macro Settings in the Trust Center must be set to Enable all macros. To set the Macro Security do the following:

1. Make certain you have a blank worksheet open.
2. Click on the Microsoft Office Button in the upper left corner.
3. Click on Excel Options.
4. Click on Trust Center.
5. Click on Trust Center Settings.
6. Click on Macro Settings.
7. Click on Enable all macros.

**Now the abstract spreadsheet can be opened to save the worksheet, or start data entry.**

## DATA ENTRY

The following instructions will guide you through the data entry process. If you have questions at any time during this process, please contact the Auditor of State's Office.

Abstract worksheets are preloaded with the county name, taxing district names, DLGF taxing district codes, fund titles, tax rates, and COIT homestead credit rates, if applicable.

There are three main areas of data entry that need to be completed, Section 1, Section 5 and, if applicable, TIF data. These areas will be explained in detail.

To open the abstract worksheet you will select from the Excel menu bar "File", then from the drop down menu select "Open" and in the Open box you will locate where you have saved the worksheet. Once the worksheet file has been located, then hi-lite the worksheet file name and click open.

Once the worksheet has opened the following disclaimer form should appear. **If this disclaimer form does not appear, then the worksheet macros are not working.** You must close the worksheet without saving it. If you have Excel 2000 check the macro security setting to make sure if the security is set at medium. Please refer to "Setting MACRO Security" section of this manual. Once the macro security is set at medium, then as the worksheet opens make sure the Enable Macros option is selected. If you have Excel 2007 and the disclaimer form does not appear, you will need to follow the instructions on the previous page to enable macros.

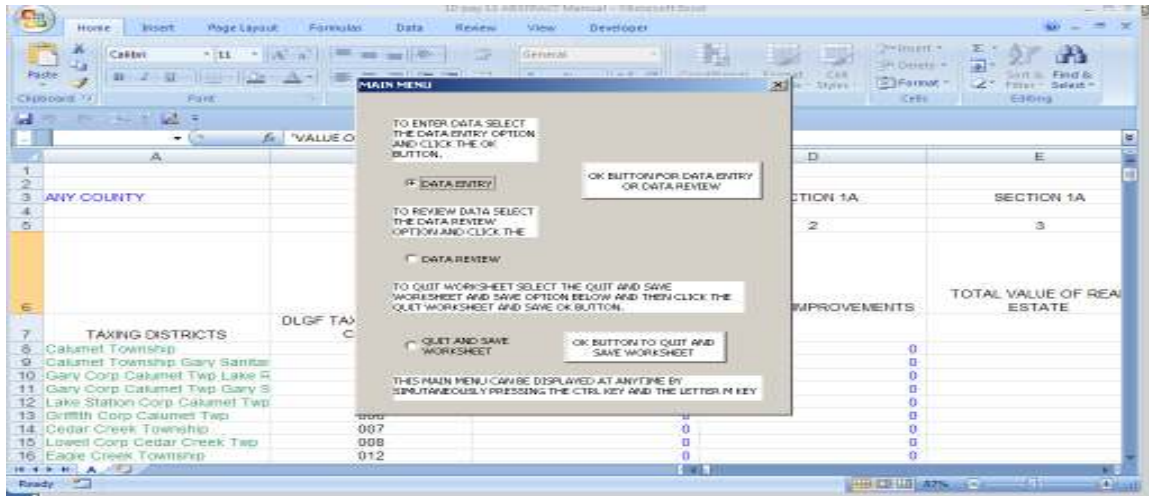

After the worksheet has been opened and the following disclaimer has appeared and after you have read and understood it, then click the OK button to continue.

After the OK button has been selected, the “Main Menu” will display. There are three options to the Main Menu.

To begin data entry, select the “DATA ENTRY” button and then click the “OK BUTTON FOR DATA ENTRY OR DATA REVIEW”.

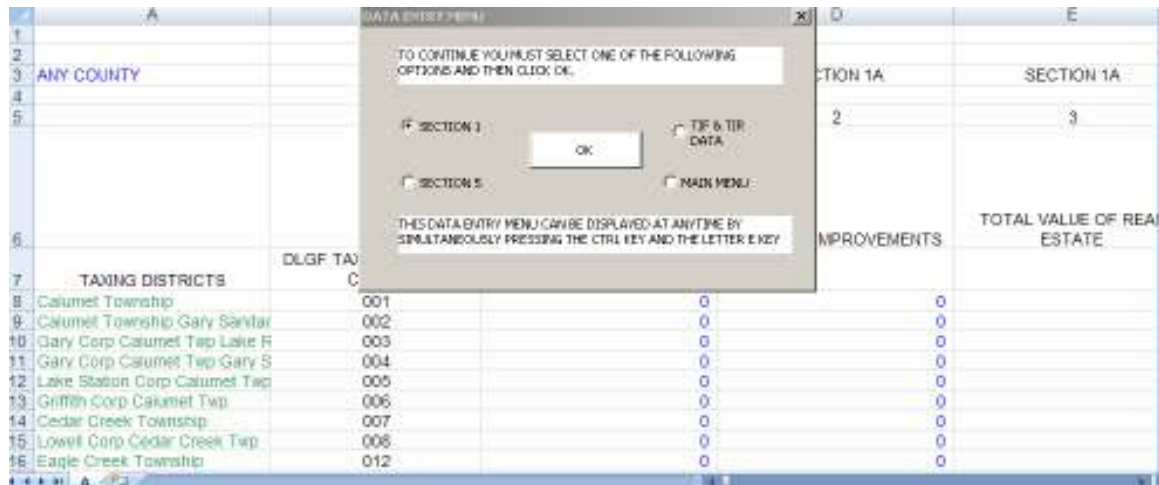

When OK has been selected the “Data Entry Menu” will display. If your county has TIF District(s), then the first data that you will need to enter will be the TIF Data. You will need to refer to PART II “TIF DATA ENTRY” of this manual to complete the TIF data.

If your county does not have TIF District(s), please continue to the next page.

## ENTERING VALUATIONS AND DEDUCTIONS IN SECTION 1

From the “DATA ENTRY MENU” select the SECTION 1 button and click the OK button.

After the OK button has been clicked, then you will be taken to Column 1 of Section 1A of the first taxing district line. Enter amounts in the value and deduction columns in Section 1A and 1B. **DO NOT ENTER** amounts in the total columns, the worksheet will automatically calculate the total columns.

	A	B	C	D	E
1					
2					
3	ANY COUNTY		SECTION 1A	SECTION 1A	SECTION 1A
4					
5			1	2	3
6					
7	TAXING DISTRICTS	DLGF TAXING DISTRICT CODES	VALUE OF LANDS AND LOTS	VALUE OF IMPROVEMENTS	TOTAL VALUE OF REAL ESTATE
8	Calumet Township	001	0	0	
9	Calumet Township Gary Sanitar	002	0	0	
10	Gary Corp Calumet Twp Lake R	003	0	0	
11	Gary Corp Calumet Twp Gary S	004	0	0	
12	Lake Station Corp Calumet Twp	005	0	0	
13	Griffith Corp Calumet Twp	006	0	0	
14	Cedar Creek Township	007	0	0	
15	Lowell Corp Cedar Creek Twp	008	0	0	
16	Eagle Creek Township	012	0	0	

Counties with TIF District(s) will have data in Column 17 in Section 1A and Column 28 of Section 1B in the TIF District(s) lines. Please refer to PART II “TIF DATA ENTRY” of this manual for instructions on data entry procedures.

In order for the Auditor of State's Office to verify the COIT (if applicable), CEDIT (if applicable), and LOIT (if applicable) Homestead Credit amounts entered in Section 5, Net Homestead Values **MUST** be entered in Column 32 of Section 1B.

The amount to enter in Column 32 "Total Net Homestead Value" is the net homestead real estate value eligible for COIT, CEDIT, and LOIT homestead credit.

If your county has a TIF District(s), then the Grand Total Current Taxes amount must be separated between the Taxing District line and the TIF District line. In other words, the Grand Total Current Tax amount on the Taxing District line of the taxing district where the TIF District is located must not include the TIF Grand Total Current Tax amount. The TIF Grand Total Current Tax amount is entered on the TIF District line. Please refer to PART II of this manual “TIF DATA ENTRY” for data entry of TIF Grand Total Current Taxes.

If you have a TIF District(s) where the taxpayers receive CEDIT Residential Property Tax Replacement Credit on increment taxes, then the CEDIT Residential Property Tax Replacement Credit amount must be separated between the Taxing District line and the TIF District line. The CEDIT Residential Property Tax Replacement Credit amount on the Taxing District line of the taxing district where the TIF District is located **must not** include the TIF CEDIT Residential Property Tax Replacement Credit amount.

Please refer to PART II of this manual “TIF DATA ENTRY” for data entry of TIF CEDIT Residential Property Tax Replacement Credit.

COIT, CEDIT and/or LOIT HSC amounts are reported separately on the abstract. If your tax billing system doesn't separate these amounts, then contact the Auditor of State's Office for a worksheet that will separate the amounts.

If you have a TIF District(s) where the taxpayers receive LOIT HSC on increment taxes, then the LOIT HSC amount must be separated between the Taxing District line and the TIF District line. The LOIT HSC amount on the Taxing District line of the taxing district where the TIF District is located **must not** include the TIF LOIT HSC amount. Please refer to PART II of this manual "TIF DATA ENTRY" for data entry of TIF LOIT HSC Amounts.

DATA ENTRY

## TIF DATA ENTRY

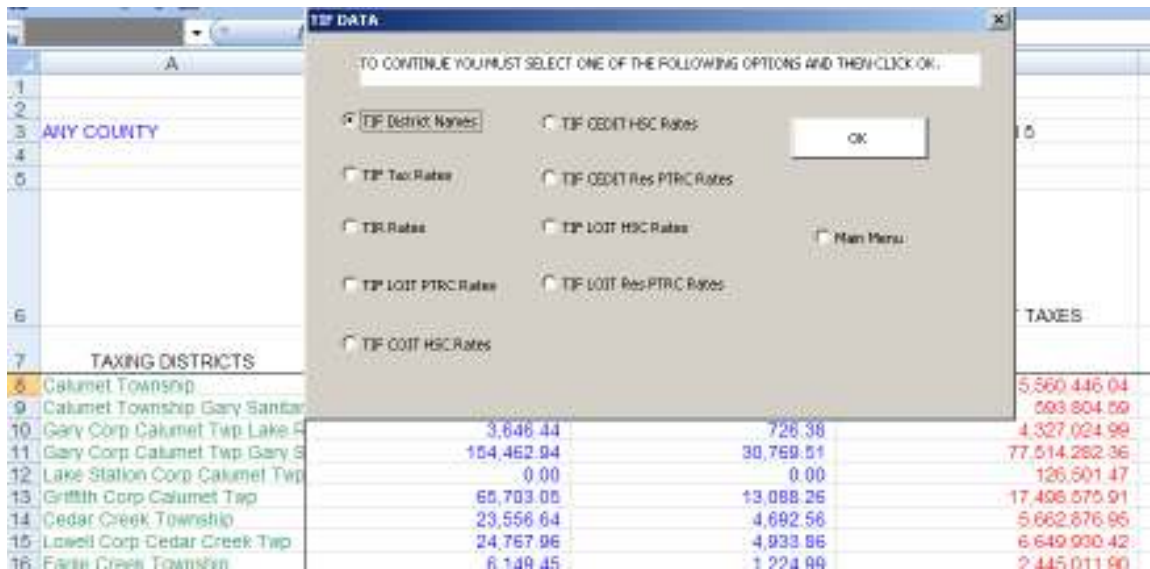

To begin data entry, select the “Data Entry” button and then click the “OK BUTTON FOR DATA ENTRY OR DATA REVIEW”.

When OK has been selected the “DATA ENTRY MENU” will display. From the Data Entry Menu you will need to select the TIF & TIR Data button and then click the OK button.

After you have selected the TIF & TIR DATA button and clicked the OK button, you will be taken to the "TIF DATA" menu. The first TIF Data item that must be entered is the TIF District Name(s). From the "TIF DATA" menu select TIF District Names button and click the OK button.

After clicking the OK button you will be taken to the first cell of the TIF Districts.

Enter the TIF LOIT PTRC rates for all TIF Districts where the taxpayers receive property tax replacement credit. If taxpayers in the TIF District pay 100% of the tax rate, or in other words don't receive the LOIT property tax replacement credit, then LOIT PTRC rates **will not** be entered for those TIF Districts. The TIF LOIT PTRC Rates will be entered in Column 10 for TIF LOIT PTRC. The TIF LOIT PTRC rates are equal to the LOIT PTRC rates for the taxing district in which the TIF district is located.

After all the TIF & TIR data has been entered, then you have completed the primary setup for the TIF Data. Next, simultaneously press the CTRL “E” keys to return to the “DATA ENTRY MENU”.

### TIF Section 1 Data Entry

After you have completed the primary setup for the TIF District(s), you are ready to enter the TIF data in Sections 1A, 1B and 5.

TIF Values need to be entered in Section 1A and 1B of the abstract.

**TIF** amount(s) on **TIF DISTRICT** line(s) are to be entered as a **negative amount(s)**.

**TIF** amount(s) entered on the **TAXING DISTRICT** line(s) of the taxing district(s) where the TIF District(s) is located are to be entered as **positive amounts(s)**.

**The Grand Total of the TIF Column should equal zero.**

The following screens are examples of the TIF entries in Real Estate. Note that the TIF entries in the Personal Property Columns will look the same as real estate entries. Real Estate TIF entries are in Section 1 Column 17. Business Personal Property TIF entries are in Section 1B Column 28.

# PART III

REVIEWING ABSTRACT

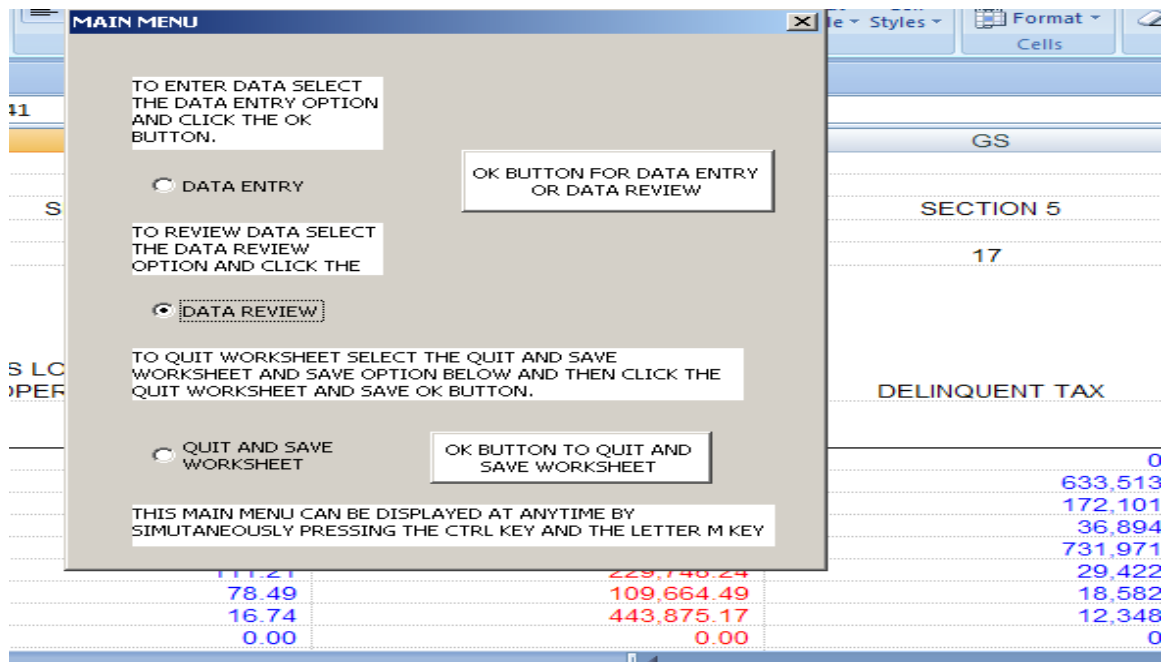

## REVIEWING WORKSHEET

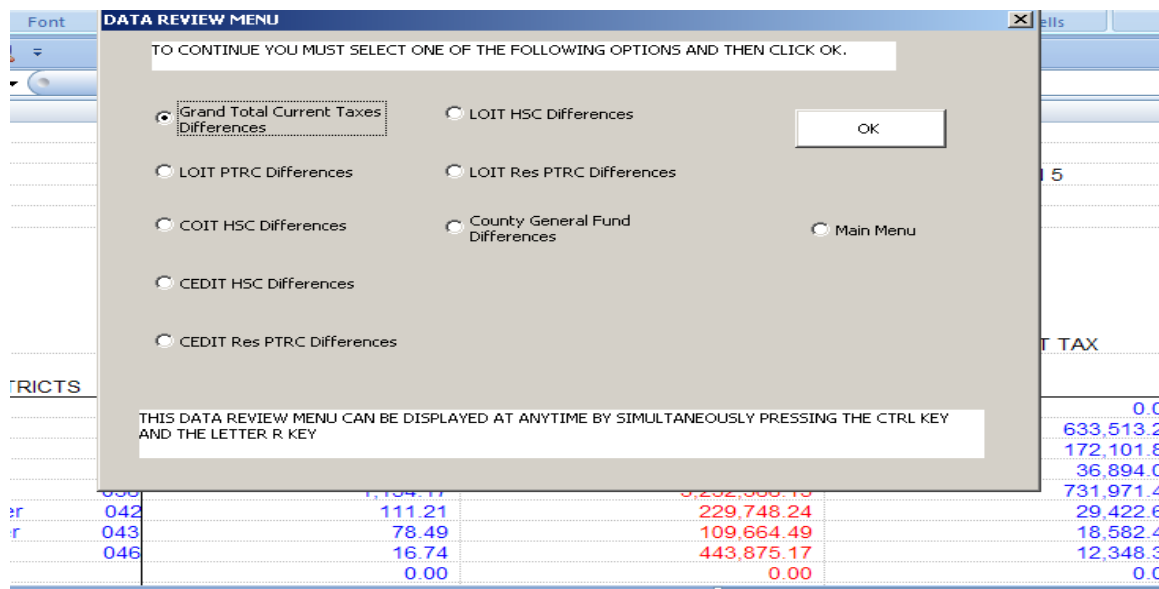

In the worksheet after Section 5 there are columns that calculate the Grand Total Current Taxes, the LOIT Property Tax Replacement Credit, the Homestead Credit (COIT, CEDIT and LOIT), the CEDIT Residential Property Tax Credit and the LOIT Residential Property Tax Credit. These calculations are based on the tax rates DLGF and you have entered to the worksheet and the assessed values and tax amounts you have entered to the worksheet. We refer to these calculation columns as “Review Area”. They help us and **you** to validate the data you have entered to the worksheet.

There will be differences in the “Rounding Difference Proof” columns, because there will be differences associated with rounding. Small rounding differences are ok and the abstract data that has been entered to the worksheet is most likely ok. Rounding differences will vary with the assessed value and tax amount. The larger the assessed value or tax amount is the larger the rounding difference is. Generally rounding differences are less the \$50.00, but if the assessed value and/or tax amount is hundreds of millions, then the rounding difference can be a few hundred dollars.

To begin the DATA REVIEW from the “MAIN MENU” select the DATA REVIEW button. Next click the “OK BUTTON FOR DATA ENTRY OR DATA REVIEW”.

To review the Grand Total Current Taxes Differences, then at the “DATA REVIEW MENU” select Grand Total Current Taxes Differences and click the OK button.

After clicking the OK button you will be taken to the Calculated Current Property Taxes Charged Difference Column.

15	Lowell Corp Cedar Creek Twp	7,146,952.31	7,143,381.40	(0.20)
16	Eagle Creek Township	2,608,965.43	2,607,094.15	0.93

The calculated current property taxes charged review area column is the calculation of taxes that is from taking the Total Net Value of Taxables from Column 30, Section 1B times the Approved Tax Rate from Column 31, Section 1B divided by 100.

**Total Net Value of Taxables (Column 30, Section 1B) X Approved Tax Rate (Column 31, Section 1B) ÷ 100 = Calculated Current Property Taxes Charged Review Area**

The amount in the Difference Column of the Calculated Current Property Taxes Charged Review Area is the difference between the calculated tax amount and the amount in Section 5 Column 6. This difference is a rounding difference.

The rounding difference should be a nominal amount, normally less than \$50.00 but can be more if the total taxes amount is several millions and should vary in proportion to the size of the taxing district. The larger the amount of taxes, the greater the rounding difference will be.

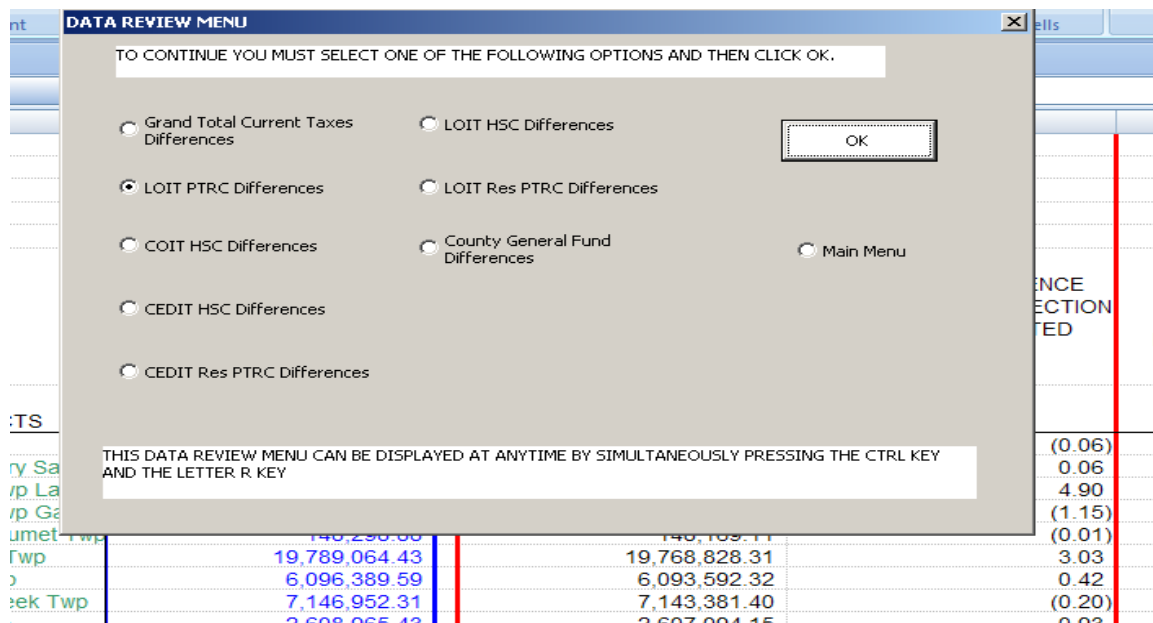

The Difference Column is seldom zero. There is almost always a rounding difference. A difference of zero normally only happens in a small taxing district with few parcels. Differences that are considered greater than normal rounding errors **must be resolved** prior to submitting the abstract.

**Common reasons for differences greater than rounding:**

1. Valuations reported in Section 1 **DO NOT** agree with tax duplicate valuations.
2. TIF increment value not entered correctly in Section 1.
3. Total current taxes reported in Section 5 **DO NOT** agree with tax duplicate.
4. TIF increment taxes not entered correctly in Section 5.
5. Statement processing charges and late assessment penalties reported in Section 5 **DO NOT** agree with tax duplicate.
6. The worksheet tax rate does not agree with the tax rate used to calculate tax statements. **(Note: all tax rates used to calculate tax statements MUST AGREE with the tax rate certified by the Department of Local Government Finance. If they do not, then you will be required to recalculate tax statements.)**
7. The tax rates certified by the Department of Local Government Finance should be the same rate that has been entered to the worksheet by the Department of Local Government Finance. **If they are not, then contact the State Auditor's Office immediately.**

After the Grand Total Current Taxes Differences have been reviewed, then simultaneously press the CTRL “R” keys to return to the “DATA REVIEW MENU”.

The next data to be reviewed is the LOIT PTRC Differences. To review the LOIT PTRC Differences, select the LOIT PTRC Differences button and click the OK button.

The calculation of the Less LOIT PTRC review area column is the Total Net Taxable Value (Section 1B, Column 30) times the Approved Tax Rate (Section 1B, Column 31) divided by 100 times the LOIT PTRC rate divided by 100.

$$\text{Total Net Taxable Value (Section 1A, Column 30) X Approved Tax Rate (Section 1B, Column 31) } \div 100 \times \text{LOIT PTRC Rate } \div 100 = \text{Review Area Less LOIT Property Tax Replacement Credit.}$$

The amounts in the Difference Column of the Less LOIT Property Tax Replacement Credit review area equals the difference between the calculated LOIT PTRC amount and the LOIT PTRC amount entered in Section 5, Column 10. This difference is a rounding difference. The rounding differences should be small amounts and should be less than the current property tax rounding differences. The difference should vary in proportion to the size of the taxing district. The larger the dollar amount of the replacement credit the larger the rounding difference will be. The difference column should rarely equal zero.

There is almost always a rounding difference. Differences that are greater than rounding **must be resolved** prior to submitting the abstract.

12	Lake Station Corp Calumet Twp	7,408.46	(0.01)	
13	Griffith Corp Calumet Twp	988,441.42	0.02	
14	Cedar Creek Township	304,679.62	(0.02)	
15	Lowell Corp Cedar Creek Twp	357,169.07	0.03	
16	Eagle Creek Township	130,354.71	(0.01)	

**Some common reasons for differences greater than rounding are:**

1. The LOIT PTRC amount reported in Section 5, Column 10 does not agree with the tax duplicate.
2. The worksheet LOIT PTRC rate does not agree with the LOIT PTRC rate used to calculate tax statements.
3. The LOIT PTRC rate entered by the county auditor in the tax rate area of the worksheet is not the same as the LOIT PTRC rate calculated by the county auditor.
4. The TIF LOIT PTRC amount was not entered in Section 5 correctly or the TIF LOIT PTRC rate was not entered in the tax rate area of the worksheet.

After the LOIT PTRC Differences have been reviewed, then simultaneously press the CTRL "R" keys to return to the "DATA REVIEW MENU".

If applicable, the next data to be reviewed is the COIT HSC Differences. To review the COIT HSC Differences, select the COIT HSC Differences button and click the OK button.

met Twp	87,255.04	174,510.09	18,323.56
wp	31,283.72	62,567.44	6,569.58
ok Twp	32,892.37	65,784.74	6,907.40

The calculation of the Less COIT Homestead Credit Review Area column is as follows: Net Homestead Value from Section 1B, Column 32 times the Approved Tax Rate from Section 1B, Column 31 divided by 100 equals the Gross Homestead Taxes. Next, take the Gross Homestead Tax times the LOIT PTRC rate divided by 100 equals the LOIT Property Tax Replacement Credit. The Gross Homestead Taxes minus the LOIT PTRC equals the Net Homestead Taxes. The Net Homestead Taxes times the COIT HSC Rate divided by 100 equals the Review Area of COIT Homestead Credit.

**Net Homestead Value (Section 1B, Column 32 X Approved Tax Rate (Section 1B, Column 31) ÷ 100 = Gross Homestead Taxes**

**Gross Homestead Taxes X LOIT PTRC Rate ÷ 100 = LOIT Property Tax Replacement Credit**

**Gross Homestead Taxes minus LOIT Property Tax Replacement Credit = Net Homestead Taxes**

**Net Homestead Taxes X COIT HSC Rate ÷ 100 = Review Area COIT Homestead Credit**

The amount in the Difference Column of the COIT Homestead Credit review area equals the difference between the calculated COIT HSC amount and the COIT HSC amount entered in Section 5, Column 11. This difference is a rounding difference. The rounding differences should be small amounts and should be less than the current property tax rounding differences. The larger the dollar amount of the COIT homestead credit the larger the rounding difference will be. The difference column should rarely equal zero.

The worksheet allocates the Grand Total Current Taxes less the Circuit Breaker amounts to the funds in Sections 2 through 4. The Grand Total Current Taxes amount is allocated by the fund tax rate. Whenever this allocation is done the individual fund amounts may not add to the Grand Total Current Taxes amount, because of rounding. In this abstract worksheet all of the rounding adjustments have been made to the County General Fund amount. The Review Area column labeled "Amount Added to County General Fund" is the rounding adjustment added to the County General Fund. These rounding adjustments should only be a few cents. If there are any adjustments greater than a few cents, then contact the State Auditor's Office immediately.

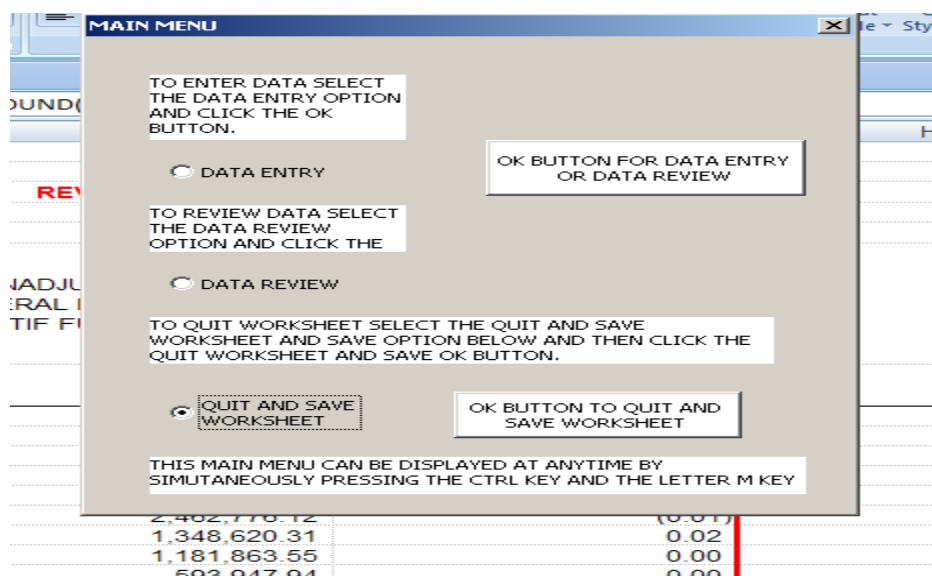

This concludes the worksheet data review.

## **SAVING ABSTRACT WORKSHEET**

## SAVING WORKSHEET

You must save the worksheet before closing it. From the MAIN MENU select the QUIT AND SAVE WORKSHEET button and click the OK BUTTON TO QUIT AND SAVE WORKSHEET.

After you have read and understood the instructions, click the OK button.

After clicking OK, then the Excel worksheet menu bar can be used to save the worksheet.

From the Excel menu bar select File and then select Save As. In the Save As box locate where you want to save the worksheet, then click the Save button.

# PART V

**ABSTRACT  
DETAILED INFORMATION  
AND GENERAL  
INSTRUCTIONS**

## GENERAL INFORMATION

---

The abstract of taxes is to be prepared as soon as the tax duplicates are completed, **but not before**. In the past, problems have occurred at December Settlement with abstract charges being different than the charges shown on the abstract filed with the Auditor of State's Office. What appears to be occurring is that abstracts are being prepared from abstract worksheets, produced by the county's computer system, that have been generated prior to the production of the tax duplicates. Careful attention needs to be taken in the generation of the abstract worksheets from the county's computer system. Calculate tax duplicates first and generate abstract worksheets immediately following. **Do not generate abstract worksheets from the county's computer system prior to calculating tax duplicates.** If the abstract worksheet is produced from the county's computer system and changes are made to tax parcels after the production of the abstract worksheet and prior to the production of the tax duplicates, then the abstract worksheet and abstract will not agree with the tax duplicates. In these instances the worksheets will need to be printed again. If the worksheets are not printed again, then at December Settlement the county's computer system will report as abstract charges the amounts from the tax duplicates and not what was on the abstract worksheet and the abstract. The premature production of the abstract worksheets is possibly the reason behind differences in abstract charges occurring at December Settlement.

After the tax duplicates have been calculated, any changes made to tax parcels **must be done** with a Certificate of Error, Auditor's Charges, Auditor's Assessments and Added Assessments. If changes are made without using the appropriate procedure, then at December Settlement the county's computer system will report, as abstract charge amounts, amounts that are different than what was on the abstract worksheet and abstract.

Please, do not delay filing the abstract of taxes. In the past counties have waited to file the abstract of taxes at the same time the June Settlement is filed. This is **unacceptable**; first because the abstract **should be filed and approved** before tax statements are mailed, secondly it is not fair to other counties for us to have to process an abstract when we should be processing June Settlements.

The abstract of taxes is the report of the current and delinquent real estate taxes, current and delinquent utility taxes, delinquent non business personal property, current and delinquent business personal property taxes, and delinquent mobile home taxes. **Current mobile home taxes are not reported on the abstract, they are reported as added Charges and Assessments at December Settlement.**

The current taxes reported on the abstract must agree with the assessments, deductions, and current taxes in the real estate, utility, and business personal property tax duplicates. Some counties may not have a separate utility tax duplicate. Some counties may include utility assessments and taxes in the business personal property duplicate. However, utility assessments, business personal property assessments and taxes are to reported separately on the abstract.

The delinquencies reported on the abstract must agree with the delinquencies in the real estate, utility, personal property, and mobile home tax duplicates, and should also agree with the delinquencies reported at the previous December Settlement plus the penalties added at the prior final tax installment due date.

**The assessments and total taxes reported on the abstract are not computed, it is a summary report of the tax duplicates.**

### **Taxing Districts -**

If you have a TIF district(s), then they must be listed at the bottom of the abstract. Above the TIF district(s) are the township, town and city taxing districts. These taxing districts are loaded to the abstract worksheet by the Department of Local Government Finance. The abstract worksheet has a specific location at the bottom of the abstract for TIF district(s).

In the following instructions references are made to taxing district lines, and TIF district lines. **Taxing district lines** are the township, town, and city taxing district lines at the top of the abstract. **TIF district lines** are the TIF district lines at the bottom of the abstract.

## **SECTION 1A DETAILED INFORMATION:**

---

### **Section 1A and 1B:**

The assessment values and deductions reported in Sections 1A and 1B must agree with the assessment values and deductions in the real estate, utility, and business personal property tax duplicates. Utility assessments are reported separately from the business personal property assessments on the abstract.

### **Section 1A: Real Estate**

**NOTE: GOVERNMENT PARCEL VALUES AND EXEMPTIONS ARE NOT INCLUDED ON THE ABSTRACT**

#### **Section 1A, Column 1**

Section 1A, Column 1 is the total residential and nonresidential real estate land value. These amounts must agree with the gross land value from the real estate tax duplicate. Do not show the residential and nonresidential values separately; show them as one amount in column 1. The gross land values are normally in column 1 of the tax duplicate.

#### **Section 1A, Column 2**

Section 1A, Column 2 is the total residential and nonresidential real estate improvement value and must agree with the gross improvement value from the real estate tax duplicate. Do not show the residential and nonresidential values separately; show them as one amount in column 2. The gross improvement values are normally in column 2 of the tax duplicate.

#### **Section 1A, Column 3**

Section 1A, Column 3 is the total of columns 1 and 2. The abstract worksheet calculates this total.

If there is a TIF district(s) ***do not enter any amounts*** on the TIF district line for columns 1 through 3. The TIF land and improvement increment values are to be included in the land and improvement values reported on the taxing district line of the taxing district where the TIF district is located.

## **Section 1A, Columns 4 through 16**

In Columns 4 through 16, enter real estate deductions. Deduction amounts are entered as positive amounts and are deducted as the taxing district lines are calculated across.

Deduction amounts may have to be obtained from some source other than the tax duplicate. Deduction amounts may not be sufficiently detailed in the tax duplicate to complete Columns 4 through 16 of Section 1A. One source for obtaining the deduction amounts will be the assessor's books, or valuation reports. If a source other than the tax duplicate is used, then **make sure** the total deduction in the other source agrees with the total deductions in the tax duplicates. If they do not agree, the deduction amounts reported in Section 1A will be incorrect and will cause the abstract to be incorrect.

**If a deduction(s) exist for your county that is not listed in columns 4 through 16, then contact the Auditor of State's Office for corrective measures. IF A DEDUCTION(S) EXISTS FOR YOUR COUNTY THAT IS NOT LISTED IN COLUMNS 4 THROUGH 16 DO NOT COMBINE THE DEDUCTION WITH ONE OF THE DEDUCTIONS LISTED!**

If there is a TIF district(s), **do not** enter amounts on the TIF district line for columns 4 through 16.

## **Section 1A, Column 17**

If there is a TIF District(s) that includes real estate increment value(s), then the increment value(s) are to be entered in Section 1A, Column 17.

The increment value(s) can be calculated using either the State Board of Accounts program, manually, or your tax system may provide those values. Questions concerning TIF increment value(s) will have to be directed to the Department of Local Government Finance.

On the **taxing district line** of the taxing district where the TIF District is located, enter the increment value as a **positive amount**. The increment value will be deducted as the line is calculated across. Please refer to Part II of this manual "TIF Data Entry" for an example.

On the **TIF district line** at the bottom of the abstract, enter the increment value as a **negative (-) amount**. On the TIF District line the increment value will be added as the line is calculated across. Please refer to Part II of this manual "TIF Data Entry" for an example.

In the TIF column the negative increment value on the TIF District line will be subtracted from the increment value on the Taxing District line of the taxing district where the TIF District is located. **The grand total of the TIF column will equal zero.**

**Do not use column 17 for anything other than TIF increment value.** If there is no TIF district(s) that has real estate increment value(s), then this column will be blank.

### **Section 1A, Column 18**

Section 1A, Column 18 is the net value of real estate and must agree with the net value of real estate from the real estate tax duplicate. The net value is in column 4 of most tax duplicates. Column 18 is obtained by subtracting columns 4 through 16 from column 3. The abstract worksheet calculates this total.

Section 1A, Column 18 of the TIF district(s) line will equal the increment value entered in column 17, except that the amount in column 18 will be a positive amount. The worksheet program calculates this column as long as the increment value was entered on the TIF district(s) line in column 17 as a negative (-) amount.

Taxing districts that have TIF District(s), the amount in column 18 on the taxing district line of the taxing district where the TIF District is located; plus the amount in column 18 on the TIF District line should equal the tax duplicate net real estate value of the taxing district.

## BUSINESS PERSONAL PROPERTY AND TOTAL VALUATIONS

---

### Section 1B, Column 19

Section 1B, Column 19 is the state and local assessed utility and railroad values. The values will be found either in a separate utility tax duplicate, or in a section of the business personal property tax duplicate. The values are normally in column 1 of the tax duplicate. **YOU MUST INCLUDE BOTH THE STATE AND LOCALLY ASSESSED UTILITY AND RAILROAD VALUES IN THIS COLUMN FOR THE DATA TO BE CONSIDERED COMPLIANT.**

### Section 1B, Column 20

Section 1, Column 20 is the gross business personal property tax values other than the utility and railroad values. The business personal property values are normally in column 1 of the tax duplicate.

### Section 1B, Column 21

Section 1B, Column 21 is the total of columns 19 and 20. The abstract worksheet calculates this total.

If there is a TIF district(s) that includes business personal property tax **do not** enter any amounts on the TIF district line for columns 19 and 20. The TIF increment value is to be included in the values reported on the taxing district line of the taxing district where the TIF district is located.

### Section 1B, Columns 22 through 27

Section 1B, Columns 22 through 27 is where the business personal property tax deductions are reported. As with the real estate deductions, business personal property tax deduction amounts may have to be obtained from some source other than the tax duplicate. The tax duplicates may not sufficiently detail the deductions to complete these columns. The other source may be the assessor's book, or valuation reports. If a source other than the tax duplicate was used, then make sure the total deductions in the other source agrees with the total deductions in the tax duplicates; if they do not agree, then the values reported in Section 1B will be incorrect. This will cause the abstract to be incorrect.

The deduction amounts entered in columns 22 through 27 are entered as positive amounts and are subtracted as the taxing district line is calculated across.

**If there is a deduction that exists for your county that is not listed in columns 22 through 27, then contact the Auditor of State's Office for corrective measures.**

### **Section 1B, Column 28**

If there is a TIF District(s) that includes business personal property increment value(s), then the increment value(s) are to be entered in Section 1B, Column 28.

The increment value(s) can be calculated using either the State Board of Accounts program, manually, or your tax system may provide these values. Questions concerning TIF increment value(s) will have to be directed to the Department of Local Government Finance.

On the **Taxing District** line of the taxing district where the TIF district is located, enter the TIF increment value as a **positive amount**. On this line the increment value is deducted as the line is calculated across. Please refer to Part II of this manual "TIF Data Entry" for an example.

On the **TIF District** line at the bottom of the abstract, enter the increment value as a **negative (-) amount**. On this line the increment value is added as the line is calculated across. Please refer to Part II of this manual "TIF Data Entry" for an example.

In the TIF column the negative increment value on the TIF District line will be subtracted from the increment value on the taxing district line of the taxing district where the TIF District is located. **The grand total of the TIF column will equal zero.**

**Do not use column 28 for anything other than TIF increment value.** If no TIF district(s) have business personal property increment value(s), then this column will be blank.

### **Section 1B, Column 29**

Section 1B, Column 29 is the net value of utility, railroad and business personal property. The net value in this column must agree with the net value in the utility, and business personal property tax duplicate. The net value is in column 4 of most tax duplicates. Column 29 is obtained by subtracting columns 22 through 28 from column 21. The abstract worksheet calculates this total.

Section 1B, Column 29 the TIF district(s) line will equal the increment value entered in column 28, except that the amount in column 29 will be a positive amount. The abstract worksheet calculates this column as long as the increment value on the TIF district(s) line in column 28 was entered as a negative amount.

Taxing districts that have TIF District(s), the amount in column 29 on the taxing district line of the tax district where the TIF District is located, plus the amount in column 29 on the TIF District line, should equal the tax duplicate net utility and business personal property value of the taxing district.

### **Section 1B, Column 30**

Section 1B, Column 30 is the grand total of net real estate, state and local assessment of railroad, utilities and business personal property.

### **Section 1B, Column 31**

Section 1B, Column 31 is where the taxing district total tax rate is entered. The abstract worksheet calculates this by copying the total tax rate from the tax rate area of the worksheet. If there is a TIF district(s), then the tax rate on the TIF District line of Section 1, Column 31 is the total taxing district rate of the taxing district where the TIF District is located. If there is a TIF District and there is no TIF District rate in Column 31, then verify that the TIF District tax rate has been entered. Please refer to Part II of this manual "TIF Data Entry" for an example.

### **Section 1B, Column 32**

Section 1B, Column 32 is where the net homestead real estate value eligible for homestead credit is entered. If a homestead credit amount is entered in Section 5, Column 11, in Section 5 Column 12, or in Section 5 Column 14, for a taxing district, then there **must be** a net homestead real estate value entered in Section 1B, Column 32. If there is a TIF District with net homestead real estate values eligible for homestead credit, then the net homestead values must be entered in the TIF District line of Section 1B, Column 32.

**Section 1B Column 33**

Section 1B, Column 33 is where the net residential value for CEDIT and/or LOIT residential property tax credit amount is entered. If a CEDIT residential property tax credit amount is entered in Section 5, Column 13 or in Section 5 Column 15 for a taxing district, then there must be a net residential value for CEDIT and/or LOIT residential property tax credit entered in Section 1B, Column 33. If there is a TIF District with net residential value eligible for CEDIT and/or LOIT residential property tax credit, then the net residential value eligible for CEDIT and/or LOIT residential property tax credit values must be entered in the TIF District line of Section 1B, Column 33.

## SECTION FIVE DETAILED INFORMATION:

---

### **Delinquent Taxes and Penalties**

The delinquent taxes and penalties that are to be reported in Section 5 Columns 17, 18, 19 and 20 are the delinquent taxes and penalties from the previous December Settlement plus the penalties added after that settlement.

Generally the amounts for this part of the abstract are from fall penalty reports that were produced as a part of the December Settlement. For systems that do not produce such reports, then the amounts are obtained from the previous year tax duplicates.

The delinquent taxes and penalties that are to be reported are the real estate, utility, personal property, and mobile home delinquent taxes and penalties. This part of the abstract is the **only** part of the abstract where mobile home taxes are included, but only the delinquent taxes and penalties. **The current mobile home taxes are not reported on the abstract.** Current mobile home taxes are reported as added charges at December Settlement.

If there are TIF district(s) that have delinquent increment taxes, then those delinquencies are to be reported on the TIF district lines in the appropriate columns.

### **Section 5, Column 17**

Section 5, Column 17 is where the delinquent real estate, utility, personal property and mobile home tax at the last December settlement is entered. This amount must agree with the total of the delinquent tax carried to the new duplicate column of the previous year real estate, utility, personal property and mobile home tax duplicates. **The grand total of this column must agree with the total of lines 24, 25 and 29 of the previous year December Settlement Sheet.**

### **Section 5, Column 18**

Section 5, Column 18 is where the delinquent real estate, utility, personal property and mobile home penalties delinquent at the last December settlement are entered. This column must agree with the total of the delinquent additional penalty on prior year second installment, delinquent penalty on current first installment, delinquent 10% penalty on former year's taxes and delinquent penalties and interest unpaid

columns of the previous year real estate, utility, personal property and mobile home tax duplicates. **The grand total of this column must agree with the total of lines 26, 27, 28 and 30 of the previous year December Settlement Sheet.**

### **Section 5, Column 19**

Section 5, Column 19 is where the penalty added on the delinquent second installment of real estate, utility, personal property and mobile home taxes is entered. This column should agree with the total of the penalty on the second installment delinquent column of the previous year real estate, utility, personal property and mobile home tax duplicate

### **Section 5, Column 20**

Section 5, Column 20 is where the 10% penalty added on the delinquent prior year's taxes of real estate, utility, personal property and mobile home taxes is entered. This column should agree with the total of the 10% penalty on delinquent tax unpaid column of the previous year real estate, utility, personal property and mobile home tax duplicates. **The grand total of this column should agree, within a rounding difference, 10% of line 29 of the previous year December Settlement Sheet.**

### **Section 5, Column 21**

Section 5, Column 21 equals the total of Section 5, Columns 18, 19 and 20. The abstract worksheet calculates this column for you. **This column should also agree with the total of the delinquent penalties and interest carried to the new duplicate column of the previous year real estate, utility, personal property and mobile home tax duplicates and must agree with the delinquent penalties amount in the current year tax duplicate.**

### **Section 5, Column 22**

Section 5, Column 22 is the total of Section 5, Columns 17 and 21. The abstract worksheet calculates this total.

### **Section 5, Column 23**

Section 5, Column 23 is the total of Section 5, Columns 6 and 22. The abstract worksheet calculates this total.

## Section 5 – Grand Total Current Taxes

### Section 5, Column 6

Section 5, Column 6 is where the grand total current taxes are entered. The grand total current tax amount includes the gross real estate, utility and business personal property taxes plus the real estate, utility, and business personal property statement processing charges, and the late assessment penalties on business personal property.

If there is a TIF District(s), then the current gross taxes on the TIF increment value is entered on the TIF District line in Column 6 Section 5. The TIF District current tax amount can be calculated by either using the State Board of Accounts TIF program, manually, or your tax system may provide this amount. Please refer to Part II of this manual “TIF Data Entry” for an example.

The amount is calculated manually by dividing the TIF District net value in Section 1B, Column 30 by 100, then multiply that amount times the tax rate in Section 1B, Column 31. **If the calculated TIF current tax amount is not evenly divisible by two, then the amount should be adjusted up or down so that it is evenly divisible by two.**

**The current tax amount entered on the taxing district line of the taxing district where the TIF District is located must be reduced by the TIF current tax amount.**

The Grand Total Current Tax Amount entered in Column 6 of Section 5 must agree with the Tax Duplicate Gross Tax Amount **including** statement processing charges and late assessment penalties.

If there is a TIF District(s), then the grand total current tax amount entered on the taxing district line of the taxing district where the TIF District is located plus the grand total current tax amount entered on the TIF District line must agree with the tax duplicate gross tax amount including statement processing charges and late assessment penalties.

## **TESTING THE TAX CALCULATIONS IN THE TAX DUPLICATE**

On the grand total line of each of the tax duplicates take the net value of taxable property column of the tax duplicate, and divide it by 100, then take this amount times the total tax rate to get the calculated total gross taxes. Take the calculated total gross tax amount, and divide it by 2.

$$\text{Net Value} \div 100 \times \text{Total District Tax Rate} = \text{Gross Taxes}$$

$$\text{Gross Taxes} \div 2 = \text{Gross Tax per Installment}$$

Compare this calculation to the gross tax each installment amount in column 5 of the tax duplicate. The two amounts should differ by a small amount, and this small difference is the rounding difference that results from comparing taxes calculated in total to the total of the individual tax statement calculations which is the grand total of column 5 of the tax duplicate.

If the difference is larger than what would be expected from rounding, then recheck the calculations. Make sure the tax rate you used to test the duplicate calculations is the same rate used to calculate tax statements, and it is the same rate certified by the Department of Local Government Finance.

### **Section 5, Column 7**

Section 5, Column 7 - enter the statement processing charges. The amount entered in this column must agree with the total statement processing charges from the real estate, utility, and personal property tax duplicates.

### **Section 5, Column 8**

Section 5, Column 8, enter the late assessment penalties. The amount entered in this column must agree with the late assessment penalties from the personal property tax duplicate.

### **Section 5, Column 9**

Section 5, Column 9 equals Column 6 less Column 7 and Column 8. The abstract worksheet calculates this total.

**Section 5, Column 10**

Section 5, Column 10, enter the LOIT property tax replacement credit on all property.

**No TIF Property Tax Replacement Credit**

If taxpayers in a TIF District do not receive LOIT property tax replacement credit or in other words taxpayers pay 100% of the tax rate, then no replacement credit is entered in Column 10 of Section 5 on the TIF district line.

## TESTING THE TAX DUPLICATE **LOIT** PROPERTY TAX REPLACEMENT CREDIT AMOUNT

To test the LOIT property tax replacement credit calculations in the tax duplicates do the following calculation on the grand total line of each of the tax duplicates. Take the gross tax each installment column of all property on the tax duplicate times the LOIT property tax replacement credit rate divided by 100 to get the calculated LOIT property tax replacement each installment.

$$\begin{aligned} &\text{Gross Tax Each Installment of All Property} \times \text{LOIT Property Tax} \\ &\quad \text{Replacement Credit Rate} \div 100 \\ &= \text{LOIT PTRC Credit Amount per Installment} \end{aligned}$$

Compare this calculation to the LOIT property tax replacement credit each installment amount in the tax duplicate. The two amounts should differ by a small amount, and this small difference is the rounding difference that results from comparing the replacement calculated in total to the total of the individual tax statement calculations which is the LOIT replacement amount in the tax duplicate.

If the difference is larger than what would be expected from rounding, then recheck the calculations. Make sure the LOIT property tax replacement credit rate used to test the duplicate calculations is the same LOIT property tax replacement credit used to calculate tax statements, and it is the same rate calculated on the LOIT property tax replacement credit rate calculation worksheets.

### **Section 5, Column 11**

In Section 5, Column 11, enter the real estate COIT homestead credit amount. **This column only applies to COIT counties who have added homestead credits.** For COIT counties, the amount on the tax duplicate will mostly like be the total of COIT, CEDIT and/or LOIT homestead credit total. **The amount entered in column 11 will be the COIT portion only.** If your tax billing system doesn't separate the various homestead credit amounts, then contact the Auditor of State's Office for a worksheet that will separate the amounts.

If there is a TIF District(s) that have homestead credit, then the COIT homestead credit entered on the **Taxing District** line of the taxing district where the TIF District is located **must be reduced** by the COIT homestead credit amount entered on the **TIF District** line.

The COIT homestead credit **does apply** to TIF increment taxes and COIT homestead credit distributions will be based on the grand total of Column 11 of Section 5.

### **Section 5, Column 12**

In Section 5, Column 12, enter the real estate CEDIT homestead credit amount. **This column only applies to CEDIT counties who have added homestead credits.** For CEDIT counties, the amount on the tax duplicate will mostly like be the total of COIT, CEDIT and/or LOIT homestead credit total. **The amount entered in column 12 will be the CEDIT portion only.** If your tax billing system doesn't separate the various homestead credit amounts, then contact the Auditor of State's Office for a worksheet that will separate the amounts.

If there is a TIF District(s) that have homestead credit, then the CEDIT homestead credit entered on the **Taxing District** line of the taxing district where the TIF District is located **must be reduced** by the CEDIT homestead credit amount entered on the **TIF District** line.

The CEDIT homestead credit **does apply** to TIF increment taxes and CEDIT homestead credit distributions will be based on the grand total of Column 12 of Section 5.

### **Section 5, Column 14**

In Section 5, Column 14, enter the real estate LOIT homestead credit amount. **This column only applies to counties who have added LOIT (CAGIT or COIT) homestead credits.** For LOIT counties, the amount on the tax duplicate will mostly like be the total of COIT, CEDIT and/or LOIT homestead credit total. **The amount entered in column 14 will be the CEDIT portion only.** If your tax billing system doesn't separate the various homestead credit amounts, then contact the Auditor of State's Office for a worksheet that will separate the amounts.

If there is a TIF District(s) that have homestead credit, then the LOIT homestead credit entered on the **Taxing District** line of the taxing district where the TIF District is located **must be reduced** by the LOIT homestead credit amount entered on the **TIF District** line.

The LOIT homestead credit **does apply** to TIF increment taxes and LOIT homestead credit distributions will be based on the grand total of Column 14 of Section 5.

## **TESTING THE TAX DUPLICATE HOMESTEAD CREDIT AMOUNT**

On the taxing district's final real estate page take the total net homestead value divided by 100 multiplied times the taxing district total tax rate to get the gross homestead real estate property tax amount. Then multiply the gross homestead real estate property tax amount times the LOIT property tax replacement credit rate (if applicable) divided by 100 to get the LOIT property tax replacement credit amount on homestead real estate taxes. Subtract the homestead LOIT property tax replacement credit amount from the gross real estate homestead property tax amount to get the net homestead real estate property tax amount. Multiply the net real estate homestead property tax amount times the total homestead credit rate divided by 100 to get the calculated homestead credit amount. Divide the calculated homestead credit amount by 2 to get the per installment calculated amount.

$$\text{Net Homestead Value} \div 100 \times \text{Tax District Rate} = \text{Gross Homestead Property Taxes}$$

$$\text{Gross Homestead Property Taxes} \times \text{LOIT PTRC Rate} \div 100 = \text{LOIT PTRC on Homestead Property Taxes}$$

$$\text{Gross Homestead Taxes} - \text{LOIT PTRC on Homestead Property Taxes Amount} = \text{Net Homestead Property Tax Amount}$$

$$\text{Net Homestead Property Taxes} \times \text{TOTAL HSC Rate (in decimal format)} = \text{HSC Amount}$$

Compare the calculated amount to the tax duplicate amount. The two amounts will differ by a small amount, which is a rounding difference. If the two amounts differ by more than a small amount, then recheck the calculations and verify that the homestead credit rate used to calculate tax statements is correct.

### **Section 5, Column 13**

In Section 5, Column 13, enter the real estate CEDIT residential property tax credit amount. **This column only applies to CEDIT counties who have adopted the CEDIT residential property tax credit.** Your tax billing system must separate the CEDIT residential property tax credit from other property tax credits.

If there is a TIF District(s) that have residential property tax credit, then the CEDIT residential property tax credit entered on the **Taxing District** line of the taxing district where the TIF District is located **must be reduced** by the CEDIT residential property tax credit amount entered on the **TIF District** line.

The CEDIT residential property tax credit **does apply** to TIF increment taxes and CEDIT residential property tax credit distributions will be based on the grand total of Column 13 of Section 5.

### **Section 5, Column 15**

In Section 5, Column 15, enter the real estate LOIT residential property tax credit amount. **This column only applies to counties who have adopted the LOIT (CAGIT or COIT) residential property tax credit.** Your tax billing system must separate the LOIT residential property tax credit from other property tax credits.

If there is a TIF District(s) that have residential property tax credit, then the LOIT residential property tax credit entered on the **Taxing District** line of the taxing district where the TIF District is located **must be reduced** by the LOIT residential property tax credit amount entered on the **TIF District** line.

The LOIT residential property tax credit **does apply** to TIF increment taxes and LOIT residential property tax credit distributions will be based on the grand total of Column 15 of Section 5.

## **TESTING THE TAX DUPLICATE RESIDENTIAL PROPERTY TAX CREDIT AMOUNT**

On the taxing district's final real estate page take the total net residential value divided by 100 multiplied times the taxing district total tax rate to get the gross residential real estate property tax amount. Then multiply the gross residential real estate property tax amount times the LOIT property tax replacement credit rate (if applicable) divided by 100 to get the LOIT property tax replacement credit amount on residential real estate taxes. Subtract the LOIT property tax replacement credit amount from the gross real estate residential property tax amount to get the net residential real estate property tax amount. Multiply the net real estate residential property tax amount times the residential property tax credit rate divided by 100 to get the calculated residential credit amount. Divide the calculated residential credit amount by 2 to get the per installment calculated amount.

$$\text{Net Residential Value} \div 100 \times \text{Tax District Rate} = \text{Gross Residential Property Taxes}$$

$$\text{Gross Residential Property Taxes} \times \text{LOIT PTRC Rate} \div 100 \text{ (if applicable)} = \text{LOIT PTRC on Residential Property Taxes}$$

$$\text{Gross Residential Taxes} - \text{LOIT PTRC on Residential Property Tax Amount} = \text{Net Residential Property Tax Amount}$$

$$\text{Net Residential Property Taxes} \times \text{Residential Property Tax Credit Rate (in decimal format)} = \text{Residential Property Tax Credit Amount}$$

Compare the calculated amount to the tax duplicate amount. The two amounts will differ by a small amount, which is a rounding difference. If the two amounts differ by more than a small amount, then recheck the calculations and verify that the residential property tax credit rate used to calculate tax statements is correct.

### **Section 5, Column 16**

Section 5, Column 16 is equal to Section 5, Column 1 less Columns 10 through 15. The abstract worksheet calculates this column for you.

### **Section 5, Column 23**

Section 5, Column 23 equals Column 6 of Section 5 plus Column 22 of Section 5. The abstract worksheet calculates this column for you.

## SECTIONS 2 THROUGH 4

---

Sections 2 through 4 are the sections where the apportionment of the Column 6 Section 5 less allocation area property tax replacement credit reimbursement and less the Section 5 columns 2 through 5 circuit breaker credits are shown.

The Column 6 Section 5 amount less the allocation area property tax replacement credit reimbursement and less the Section 5 columns 2 through 5 circuit breaker credit amount is apportioned to each fund based on each individual fund rate.

**The abstract worksheet calculates the Sections 2 through 4 amounts.**

## **TESTING SECTION 2 THROUGH 4 APPORTIONMENT CALCULATIONS**

To calculate the apportionment's manually the Column 6 Section 5 amount is reduced by the allocation area property tax replacement credit reimbursement and the Section 5 Columns 2 through 5 circuit breaker credits then divided by the taxing district total tax rate. The amount from this calculation is multiplied times each individual fund tax rate to get the amount for each fund. The next step is to total the individual fund amounts and compare the total to the Column 6 Section 5 less the allocation area property tax replacement credit reimbursement and the Section 5 Columns 2 through 5 circuit breaker credits amount.

**Section 5, Column 6 – (allocation area property tax replacement credit reimbursement) – Columns 2 through 5(circuit breaker credits) ÷ Taxing District Total Tax Rate = Allocation Amount**

**Allocation Amount X Individual Fund Tax Rate = Fund Amount**

**Total of Fund Amounts = Within Rounding Difference Section 5, Column 6 – (allocation area property tax replacement credit reimbursement) – (circuit breaker credits)**

The two amounts may differ by a few cents, if the two amounts do differ by a few cents, then it is due to rounding and the county general fund amount is adjusted by the rounding difference. If the two amounts differ by more than a few cents, then the calculations need to be rechecked.

At the end of the abstract worksheet there is a review area column and a difference column for the county general fund. It is in these columns where the rounding difference adjustments that have been made to the county general fund are shown.

If there is a TIF district(s), then the Column 6, Section 5 amount on the TIF District line will be allocated between the TIF column (column 25) in Section 4 and TIF Tax Replacement Levy column (if applicable) in Section 4. If your county does not have TIF Tax Replacement Levy, then Column 6, Section 5 will be the amount from the TIF column (column 25) of Section 4.

**NOTE:** Not all TIF Districts will have a TIF Tax Replacement Levy. You will know if there is a rate, because the DLGF will certify a TIF Tax Replacement Levy rate if one exists.

The allocation between the TIF column (column 25) in Section 4 and the TIF Tax Replacement Levy column (if applicable) in Section 4 will be based on the adjusted TIF tax rate and the adjusted TIF Tax Replacement Levy rate. In almost every county, the only entries in Sections 2 through 4 on the TIF district lines will be in the TIF column (column 25) in Section 4 and if there is a TIF Tax Replacement Levy, then in the TIF Tax Replacement Levy column (if applicable) in Section 4. There are a few counties where there is an exception to this rule and require special editing of the abstract by the Auditor of State's Office.

The only entries that should be in the TIF column (column 25) in Section 4 will be on the TIF district lines. There will be entries on both the TIF District lines and the taxing district lines in the TIF Tax Replacement Levy column (if applicable) in Section 4.

## FILING ABSTRACT WITH STATE AUDITOR

The abstract worksheet is to be filed with the Auditor of State's Office as soon as possible, after the tax duplicates are completed.

***The abstract worksheet is to be approved prior to mailing tax statements.***

For approval and to expedite the approval process, please email the abstract worksheet to [balyea@auditor.in.gov](mailto:balyea@auditor.in.gov), and [jcope@auditor.in.gov](mailto:jcope@auditor.in.gov).

The Auditor of State's Office prints hard copies of the abstract worksheet once the abstract has been approved by the Auditor of State's Office and the data is found to be compliant by the DLGF. The official approval letter of the abstract will be sent to the county when we have received a **signed coversheet and one tax rate sheet** from your county.
